PROJECTS

Clinical Trials Data Analysis

Feb. 2021

- Extracted COVID and Hepatitis A from ClinicalTrials.gov in both CSV and XML format and preprocessed in Python for use.
- Compared disease clinical trial data attributes and identified patterns and trends including adverse events, location, eligibility, intervention, duration, drugs studied in the trial and more. Visualized comparisons in Tableau.

Airline Booking System

Mar. 2020

- Identified functionalities of an airline website then applied database skills to create ER diagrams and relational models noting modalities, cardinalities, and keys to represent how the website works.
 - Created a database, tables and stored procedures in MySQL to allow for airline tasks such as booking and canceling flights.
-
